YOUR BREAK

COFFEE STATION SOLUTIONS

 **Bianchi Vending**

The most comprehensive solution for coffee corners and OCS locations.

EVIA PREMIUM BY VOCATION.

AND WHAT IF YOU COULD OFFER MORE, IN LESS SPACE?

01 PERFORMANCE BEYOND YOUR EXPECTATIONS

Evia is surprising for its high performance in such a compact size: less than 60 centimetres in height, it is capable of housing a wide choice of beverages, offering two types of coffee beans and three soluble products, while dispensing quality is kept at the highest levels by means of a variable-chamber coffee brewer and the high-pressure boiler.

The machine's small size does not limit the value of your product range, but actually brings it to the highest levels.

There is a wide choice, the coffee is excellent, and likewise the other beverages: the coffee corner becomes a small corner of paradise.

- ESV version with variable-chamber coffee brewer: for doses from 8 to 13 g. It ensures perfectly-brewed coffee in all its taste variants. It has a double output for dispensing 2 cups of coffee contemporaneously.
- Product layout with two 1.1 kg coffee bean containers, and three containers for soluble products.

02 FLEXIBILITY: MOVING UP TO THE NEXT LEVEL

Your coffee corner can be further enhanced, in both service and performance: we can offer you four extra modules to make it even more complete.

Flexibility is the key to continuing to develop your business and keep consumption at high levels.

The "treats" offered by a premium break: coffee always at the right temperature, and cappuccino as velvety as at the bar.

CUP WARMING MODULE

The finest touches for offering greater quality: serving coffee in warmed cups ensures that consumers appreciate the blend's aroma to the full.

CAPPUCCINO MODULE

Thanks to the innovative thermoblock technology you can make high-quality frothed milk, and it is also available in a version with a 4 lt refrigerator.

You are accustomed to thinking that to set up a complete and functional coffee corner, you need a lot of space, that design is just a detail, that high performance calls for complex management procedures.

Evia is ready to make you think again: an extensive, high-quality range in a reduced space, high productivity by means of very simple interaction with the machine, attractive design to ensure the enticing fascination of a premium experience.

03 THE SPONTANEITY OF A TOUCH EXPERIENCE

Interaction with Evia is intuitive, exciting and convenient, because it is designed as a sensorial conversation between man and machine. This is made possible by the large 10" touchscreen that displays video tutorials to guide the operator in the main maintenance operations: lack of coffee, excess of coffee waste, open compartments... while users can enjoy the spontaneity of the tactile experience.

Less time is needed for the job when you have a machine that responds to the rhythm of your fingers.

The touch menu also appeals to the palate, making the moment of choice even more satisfying.

04 YOUR POWER OF ATTRACTION

Elegance means seduction, the power of attraction. The glossy black finish and the satin stainless of Evia give it a touch of class all spaces, and creates interest on the part of consumers.

Black is not just a talisman of beauty, it also facilitates cleaning the machine's surfaces.

Enjoying a quality cup of coffee in the atmosphere of an exclusive setting: pure delight.

05 MAKE MORE, AND BETTER

Evia gives you the right tools for optimising resources and making more, and better. The double nozzle makes it possible to prepare two cups of coffee at the same time, and the height can be adjusted according to the beverage to be dispensed. And to serve tea and infusions, you can utilise the practical dedicated water wand.

Crowd to the coffee corner? Evia can handle the situation, even when the workload increases.

We are rewriting the rules of the coffee break: only when the expectation of pleasure is brief does it become pleasurable in itself.

06 AS RELIABLE AS AN OLD FRIEND

Getting to know Evia's hardware takes just a moment. Access to the machine's components is very quick, and so all cleaning and maintenance operations are faster and simpler.

Calibrated ergonomics to facilitate cleaning, maintenance and control.

Easy maintenance and solid, durable components.

PAYMENT SYSTEM MODULE

Add the most suitable payment system for your type of clientele: it can be set up for use with coins, keys and cards.

SIMPLE: the thermoblock is a technology easy to configure, and it enables you to prepare a creamy coffee at the right temperature.

CONTINUOUS: the rotary gear pump, together with air regulation, makes it possible to attain the desired froth consistency.

FLEXIBLE: cleaning has never been so practical and immediate. When in "maintenance" mode, the system provides video tutorials for the cleaning of the milk circuit.
